

LAB Group Work Periodic Table**Question** What patterns are there in the periodic table?**Procedure**

1. Look at the periodic table on pages 222–223 in your student book. What do the boxes tell you about each element?

2. Observe any patterns you see as you read across a row. Write your observations.

3. Observe any patterns you see as you read down a column. Write your observations.

4. Compare your observations with other students in your group.

Analysis

1. How are the elements in the periodic table arranged? Write your **conclusion**.
